

MMWC Meter Access Policy

Maury Mutual will send a notice every year to all members with the Jan./Feb. billing reminding everyone that it is their responsibility to keep access to their meter clear of blackberries and other obstructions.

If the meter reader finds an obstructed meter after that, Maury Mutual will include a notice to that member with the next billing pointing out the specific obstruction and asking that they clear their meter before the next reading. The notice will include a warning that if they do not clear their meter by the following regular reading, we will clear the meter and they will be charged \$50.

If the meter can not be read at all for a given period, Maury Mutual will charge that member as if the member had used the same amount of water as the previous billing period. Adjustment will be made the following billing period.
